---

**What You Need:**

**Equipment:**
1. Serviette Box (either made from plywood or chipboard)
2. Glass tile cutter
3. Container for mixing your grout
4. Cloth and sponge for wiping off the grout
5. Latex gloves for grouting
6. Carbon paper and pencil for tracing the pattern onto the container.
7. Old paintbrush to use to coat the tiles with glue.

**Materials:**
1. Keycoat for sealing the box or 50% diluted PVA adhesive
2. Glass tiles and dewdrops:
   - The glass tiles come in squares measuring 2cm x 2cm (0.78 inches x 0.78 inches)
   - Sky blue glass tiles: Get 175 tiles, you will use approximately 160 of them.
   - Dark forest green glass tiles: Get 70 tiles, you will use approximately 50.
   - Grass green glass tiles: Get 20 tiles just in case. You will use 16 of them.
   - Yellow dewdrops: Get a pack of 40 to 50 dewdrops as they come in different sizes. You will use about 38 of them.
   - Light blue dewdrops: Buy a pack of 25 dewdrops as they are different sizes and you will need 16 of them.
3. Wood glue / cold glue.
4. White grout depending works best with glass tiles.
5. White acrylic paint to paint the inside and underside of the box
6. Grout sealant
1. Paint your container with 50% diluted white PVA adhesive or keycoat. This will prepare and seal them. Stick on your dewdrops and let them dry. Refer to the next picture in cutting your leaf-shape.

2. Draw the shape of the leaf onto the back of the green tile. Cut it into the shape. Remember always cut away from the side. I have learnt to have a couple of extra tiles for practice purposes.

3. I have cut the blue tiles into squares. It is really easy with the glass tile cutters. Follow the curve of the design. The curves that you create will then be emphasized when you grout the piece.

4. As you can see, I’m sticking the tiles down to follow the curves. If a square does not work cut a triangle.

5. All cut and stuck down. Look at pictures 6 and 7 to see the patterns in laying down the tiles.

6. Here you can see the pattern the tiles form when grouted.

7. When you grout, mix the grout into a smooth paste and use a flat knife or spatula to apply it to the mosaic. Be gentle with your mosaic as you do not want the tiles to work loose.

   I find that if I use a sponge to gently rub the grout in a circular motion, I don’t have bubbles or cracks forming.

8. Once the grout is semi-dry, wipe off the excess with old newspaper. Buff up with a soft cloth when the grout is fully dry.

   Wear your latex gloves or you will not have any skin left on your fingers!

   Seal your grout afterwards with grout sealant.

9. Finish off your piece by painting the inside and underside of the box with either white acrylic or white PVA paint.
